Penna. Agriculture Dep't Plans National Dairy Show

It may be possible for Pennsylvania to have a national dairy show this year, Secretary of Agriculture Leland H. Bull said this week.

In the department's weekly news bulletin, Bull said, "Just recently (a) proposal for a national dairy show has been receiving considerable encouragement Governor Scranton has endorsed it and has included it in his budget"

Bull added that the show is "still a proposal" at the moment, but with "extraordinary good luck", it could be possible to hold an initial show this year

If only "green lights" show from here on, he said, "and We'll hope for that", a lot of fast footwork would still be needed

But Bull believes that with everyone concerned working together, a show could possibly be held in September.

For more than a year the Department of Agriculture has proposed a state-sponsored national dairy exposition that would become an annual event, according to Bull Because dairying is such a large factor in the state's farm program, any activity that helps the dairy industry would be sure to enhance the whole agricultural picture, he said

He pointed out that Keystone farmers regularly participate in the various breed association shows and also in the State Farm Show to the "full

Livestock Exchange Says Auction Barn 80% Complete, Reelects Slate

The Lancaster Livestock Exchange announced this week that work on the auction sale pavilion is about 80 per cent complete and the initial sale is expected to be held about the middle of March

The Exchange, which will operate the auction sales, reelected a full slate of officers Tuesday night at the Union Stock Yards

Robert S Heilbron, 71 Oak Lane, was reelected president of the 10-member exchange

Also reelected for the third consecutive year:

James C Dunlap, 1209 Marietta Ave, vice president

Robert F Johnson, 41 Hess Blvd, treasurer

Walter M Dunlap, Jr, 1410 Ridge Road, secretary

Heilbron is a partner in the Samuel L Heilbron and Sons livestock brokerage firm, James and Walter Dunlap, president and vice president-secretary respectively of Walter M Dunlap and Sons Inc, and Johnson, secretary-treasurer of the Johnson Cattle Co

Meanwhile, the United States Department of Agriculture reported this week that salable receipts of cattle, calves and sheep declined last year at the Stock Yards, but hog receipts increased 5,022 head

Salable cattle at the Lancaster Yards was 35,103 head be-

Co. Farm Women Pay Honor To Mrs. Risser

Mrs Abner Risser, Bainbridge R1, was the honored guest at the regular bi-monthly meeting of the County Society of Farm Women Executive Board Tuesday in the home of Mrs Paul Witman, Mount Joy R2

Mrs Risser, state Farm Women treasurer, who helped the state organization celebrate its 50th wedding anniversary in January, celebrated her own golden wedding anniversary yesterday

Devotions were in charge of Mrs Aaron Denlinger County president, Mrs Landis Myer, conducted the meeting. She appointed three members to the community council to represent the group They are Mrs Scott Nissley, Mrs Sterling Elmer, and Mrs Harry Usner Mrs Witman gave a talk on the Reverend Rise and his work with migrant work-

(Continued on Page 4)

PRESIDENT OF THE COUNTY Farm Women Society executive board, Mrs. Landis Myer, left, pours coffee for Mrs Abner Risser during a meeting of the board Tuesday afternoon. The board honored Mrs. Risser, treasurer of the state Farm Women group, during the meeting just four days before her golden wedding anniversary. L. F. Photo.

Dairy Meetings Open To Public

Two meetings of interest to dairymen have been scheduled by the Lancaster County Farm Bureau Cooperative

Beginning at 7 30 p m the meetings will feature discussion on breeding efficiency, feeding of forages, managing a top producing herd, and maximum profit challenge feeding of dairy herds

Speakers will include Dr. Guss, Penn State veterinarian, A F Kish, Lancaster County Farm Bureau feed consultant, Richard Fullum, manager of Masonic Homes herd, and Richard Hann, feed sales manager of Lancaster County Farm Bureau

The first meeting will be held February 12 at the Quarryville fire hall, while the second will be February 17 at the Farm Bureau cooperative building, Dillerville Road, Lancaster.

ASCS Schedules Meetings On Grain Program

The Lancaster County Agricultural Stabilization and Conservation Service this week announced two meetings to explain the 1964 feed grain program provisions

First of the public meetings will be held February 14 in the Lancaster Poultry Center, 340 W Roseville Road, Lancaster The second one will be February 19 at the Quarryville fire hall Both meetings will begin at 8 p.m.

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average 3 to 6 degrees above the normal range of 40 degrees in the afternoon to 23 degrees at night. Near seasonable temperatures are expected during the first half of the period and milder during the second half. Precipitation may total more than 0.4 inch (melted) falling as general rain about Monday.

Dairymen everywhere are getting more milk

with Ful-O-Pep Cattle-izer Dairy Feed

23% more milk — "We increased our production 23% between 1962 and 1963," says Mr. Ralph Sellers, Lebanon, Pa. "In 1962 on DHIA and with another feed, our herd averaged 12,233 lbs. milk and 490 lbs. butterfat. In 1963, we milked an average of 15,090 lbs. milk and 531 lbs. fat, with half the herd going on Ful-O-Pep Cattle-izer Dairy Feed in November 1962, and the rest in July 1963."

Herd jumps 19.9% for milking year

Mr. L. C. Metzler and Sons, Rodney and Don, of Martinsburg, Pa., have been feeding their herd on Ful-O-Pep Cattle-izer Dairy Feed for the past year. Their DHIA records show:

Year	No. cows	Lbs. milk	Lbs. fat
1962	47.8	11,703	430
1963	48.9	14,025	492

This means an increase in milk production of practically 20% — after going on Cattle-izer. "Net income per cow has increased between $55 and $60," says Mr. Metzler.

See what Ful-O-Pep Cattle-izer Dairy Feeds can do for your milk production!

Weekly Broiler Report

Placement of chicks for broilers in the state during the week totaled 667,000 chicks, up two per cent from the previous week, the Pennsylvania Crop Reporting Service said this week.

The total was 20 per cent below the total of one year ago Total settings of broiler type eggs during the week was 1, 267,000 eggs, which was about the same as the previous week.

Placements in the 22 major broiler producing states was 37,617,000 birds during the week, two per cent above the previous week.
ago in some of the major pro-

At farm prices were about steady at the 15 cent level in the 22 major producing states during the week.

Heavy placements 8-9 weeks ago insome of the major producing states produced fully adequate to burdensome supplies. Areas which held to only slightly increased placements were generally clearing supplies satisfactorily or running short.

Incidence of respiratory infection and higher than normal condemnations caused sizes to run irregular Undertone was steady at the close as sales became less competitive.

On the West Coast offerings were about in balance with needs Demand was slower in all areas.

Ready to cook prices in the terminal markets were unchanged to slightly lower. Supplies were fully adequate for the fair unaggressive demand Light feature activity added little impetus to movement Arrivals contained a greater portion or the small sizes and were often slow in clearing. Some dealers turned to other than regular sources of supply to obtain a more complete range of sizes and to be more competitive pricewise.

Try A Classified

PRESENTING A PLAQUE TO Mr. and Mrs. William Myer, Myerstown R. D. is Chester Graybill, president of Miller and Bushong feed company. The plaque recognized Myer for his Master Farmer award presented at the 1964 Pennsylvania Farm Show, and for his more than 18 years of dealing with the Rohrerstown feed firm. Presentation was made at a banquet for the sales and management staff of Miller and Bushong last Saturday night at the Host Motel, Lancaster.

● Delmarva

Broiler Prices Continue Gain

Live broiler prices at farms continued to advance approximately a half cent during the 24 hour period ending 10 30 Friday morning

Broilers averaged 15 1 to 17 1 at farms with reported purchases of 1,100,000 head including 523,400 head purchased at Thursdays auction in Selbyville, Del

The Delmarva broiler-feed ration for the week ending Jan 31 was down one point from the previous week at 3 0 Broilers during the week averaged 14 93 per pound and mash cost the grower $100 03 per ton.

From Where We Stand . . .

Skimming Off The Cream

When we came in the office one day last week there was a copy of a national business and financial weekly journal on the desk.

At story titled "Skimming Off the Cream" had been penciled by the retired business man who brought the paper to the office. He thought we would be interested in reading it.

We would, indeed!

One gets the idea from the article (which is pointed to business men) that the dairy companies are mankind's benefactors and have been the butt of a cruel joke perpertrated by nature and the farmer.

After describing one plant's modernization program, the article says ". . . is in a way symbolic of the many steps the nation's dairies are taking these days to free themselves from a profit squeeze between rising costs on one hand and, on the other, declining consumption of butter and fatty cheeses by diet-conscious Americans."

It goes on — "The dairy processor has clearly been caught in the middle. Adding to his woes is the fact that the cows seem unaware that Americans drink no more milk in May and June than in November and December. When pastures are green in the spring, the herds produce much much more than in the fall when they have to be fed in the barn.

"Most processors contract to take all the milk a farmer can deliver, not only in the months of relative scarcity, but also in the flush season. They assume the responsibility of disposing of the surpluses, which run as high as 20 per cent over demand even in low-production months, and up to 100 per cent above at the peak.

"Meanwhile, the dairy processor has to buy fresh milk from farmers at prices regulated by federal or state authorities . . . Little wonder, then, that milk profits for the distributors are skimpy even by food processing standards . . ."

Not one word did the article say about quotas imposed by dairy companies Not one word did it say about how much milk goes into class II and class III categories for which the dairy companies pay much less. Not one word did it say about the guaranteed profit figured into the selling price which is also regulated by federal orders.

As we said before, it made the dairy companies appear to be the benefactors of mankind.

We do not believe that any out-and-out lies were told, but the picture was pretty well shaded. For the businessman who has no other contact with the dairy industry, the view is rather one sided.

Now we know that the farmer has his side to tell too, but the above is what too often becomes the steady diet of the metropolitan reader.

We wholehartedly endorse the investment Lancaster County dairymen are making to purchase advertising space in which to tell their side of the story This is what we must do if we hope to compete in this complex economy where an industry's image can mean survival or defeat.

At least that's how it looks from where we stand.

★ ★ ★ ★

Cows Are Like Camels

University of Arizona scientists report there is a wide variation in the amount of water used by individual animals. Working with rats, they found that some individuals drink eight times as much as others. This would be highly valuable in commercial animals. For example, we may be able to select beef cows that can get along on less water and range farther from water holes. We hope they won't need to have a hump.

John Strohm in "Top Dollar Farming"

★ ★ ★ ★

When Should a Farmer Borrow Money?

Some questions are suggested by University of Delaware farm management specialist W. T. McAllister to help answer that question. First, can the farmer show that the proposed loan will earn enough extra income to pay the interest, pay back the principal, and add to his income? What factors now limit profitableness of the farm and will the proposed loan correct them? What is the productive potential of the farm? He says a good loan must do more than trade dollars.

★ ★ ★ ★

Bill for Detergents — Detergents that will readily decompose and not pollute natural water sources is the general aim of a bill recently reported to the Senate by its Committee on Public Wokrs.

★ ★ ★ ★

Nothing Unique — The special school milk program isn't unique to the United States: Top on the list is Denmark where a school milk program provides 3 pints of milk per day per child, from November to April. Great Britain's program furnishes a half pint per day to school children and Sweden pours out three quarters of a pint per day. Australian children under 13 get a half pint per day and the Netherlands kicks in with 40 quarts per child per year Many other countries also have sizeable problems.

★ ★ ★ ★

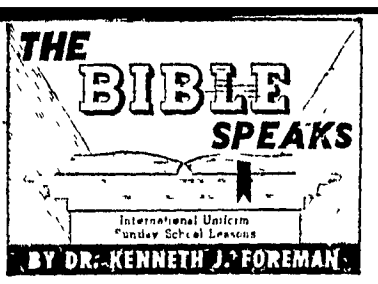
Wrong Exercise — From the Highland, Ill. News Leader: "The only exercise some folks get is jumping to conclusions, running down their friends, side stepping their responsibility, and pushing their luck."

★ ★ ★ ★

Better Re-Vaccinate — The Public Health Service says it's wise to get revaccinated for smallpox every three years. There have been a number of smallpox scares in this country during the past year.

★ ★ ★ ★

Hasn't Hurt Yet — The Lennox, S D., Independent makes this astute observation: "In observing some government officials' refusal to face reality in dealing with the adversaries of our system, we are reminded of the man who jumped out of a 40th story window, and when passing the fifth story called out to a friend, "It hasn't hurt yet!"



Inner Circle

Lesson for February 9, 1964

Background Scripture: Matthew 4 18-22; 17 1-13, Mark 3 16 17, 14 32-42, Luke 8 49-56, Acts 4 13 12 1-3
Devotional Reading: John 21 15-22.

JESUS never played favorites in the sense of treating one or two persons more generously than he treated others. On the other hand he did not treat his men as if they were all alike, so many sticks in a row. If Jesus differed in his dealings with men it was because the men were different As everybody knows, not all the crowds that followed him from place to place were his followers, really.

Dr. Foreman

Out of those crowds there were some, perhaps many, who were real 'followers," eager to learn all he taught. Out of those followers, called disciples, there was a small group, an even dozen men, who were not only disciples but apostles,— this last name being (in our Greek New Testament) the word for envoy or ambassador Jesus not only taught these twelve men, he taught through them.

Friends all different

But not even this was the inner circle There were three men who were more intimate with Jesus, by his own choice, than any others. They were with him, by his special invitation, at the time of his transfiguration, and also in Gethsemane. They did not understand what was going on, on either occasion; but it is clear that Jesus craved their company, even if they did what we think we could never do—go to sleep Fancy any one sleeping on the Mount of Transfiguration, or on that night when he was betrayed! Yet these men, stupid as they must have seemed to themselves when they thought about it afterwards, were the only inner circle of friends that Jesus had. No two were alike. If you had to give those men a written examination, you might have thought Simon Peter the dullest of the lot. But wherever there was action, Peter was there. He was the kind of man who is a natural leader, the kind of man you would depend on in a fight. James is abscure, not so well known as his brother John. We do know that Jesus' nickname for James and John was Boanerges, "the thunder boys." They were the two who once wanted to burn with "fire from heaven" a whole village just because no one offered them beds.

Friends all alike

In spite of the many differences between the three close friends of Jesus, they were, or came to be, strongly alike. This was undoubtedly due to their common loyalty to, and close acquaintance with, Jesus, their Master and Teacher. Jesus did not try to make them all over into one single mold. If you read, for example, the writings of Peter and of John in the New Testament, you will find that even in mature years and with long Christian lives behind them, John was still John and Simon Peter still Peter. Yet they had a common likeness to Christ. We tend to become like those we most admire.

The heart's need

Peter, James and John show how it has been with Christians ever since. No two are alike; some of us are so different that we find it hard to live with the others, and they with us. Yet among true Christians everywhere there is some family likeness: A Christian always feels at home with other Christians wherever they may be. Further, now as then, some Christians are closer to Christ than others are. Shall we say that some Christians are more sympathetic with God, they have a keener feeling for what God is doing, they are more aware of his presence. Now the number of persons Jesus of Nazareth could treat as intimate friends was limited; but the Risen Christ, the "Friend Unseen," has no such limitations. Can we doubt that Christ is now still in search of friends? He needs friends—indeed in the New Testament his friends are sometimes called his "body." Without a body Christ would be a kind of unremembered ghost in this world. Why should we be content with being mere distant acquaintances of our Lord when we are invited to become his friends?

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Test Farm Seeds

All seeds offered for sale in Pennsylvania must be labeled as to variety, kind, purity, germination, and noxious weed content. All farmers wishing to sell home-grown clover or alfalfa seed should have the seed tested at the Seed Laboratory, Department of Agriculture, Bureau of Plant Industry, Harrisburg, Pa. A five-ounce sample of the seed is required and the cost is $2.50 per sample. Growers are urged to get this test before selling seed, allow about 30 days for test results.

To Insulate Ceiling Above Livestock

Dairy and livestock producers that are having the problem of condensation on the ceiling of the barn in cold weather, should do some insulating to correct the problem When the warm air from the lower part of the barn, comes into contact with the cold ceiling, condensation takes place and in extreme cases we get dripping from the ceiling One remedy is to cover the barn floor above with 4 to 6 inches of hay, straw, sawdust, shredded corn fodder, or any other bedding material. Keep the floor covered at all times during the cold winter months.

To Use Caution With Chloro IPC Spray

Alfalfa growers with a chickweed problem may want to use the Chloro IPC spray to kill down the growth during February or early March (too late for best results) Spray operators are reminded that this spray material will kill most of the grasses such as timothy, orchard grass, or brome grass that is in the stand In addition, do not use Chloro IPC on stands of winter grain that contain chickweed.

To Store Seeds Away From Weed Control Sprays

The possible fumes from herbicides may be sufficient to reduce or kill the germination of many types of farm and garden seeds During the winter and spring months, the spray materials for killing weeds should be stored in a separate room or building from any seeds that are to be planted this year.

HOW GOOD ARE EARLY BIRD ALL MASH LAYER FEEDS?

Judging by the enthusiastic comments we get from many of our customers, they must be pretty good.

As good as any in Eastern Pennsylvania, no doubt.

We get reports of:

Low Conversions — **Good Egg Quality**
Excellent Production — **Good Flock Health**
And Low Costs

NO WONDER —

JUST LOOK AT THE PRODUCT!

- Extra Protein – 17%. NOT 15 OR 16%.
  Maintains body while peaking — Longer peak periods
  Helps prevent neck molts
- IT'S A QUALITY PROTEIN.
  Completely balanced.
  Supplies a superior pattern of amino acids.
  (Improves conversions up to 9 points)
- ARSANILIC ACID.
  Increases egg production. Improves efficiency (lowers costs).
  Reduces mortality. Improves flock health.
- ASCORBIC ACID
  To better make use of the calcium in the feed and improve shell quality.
- VITAMIN FORTIFICATION
  In excess of daily bird requirements
  Maintains proper intake of these important ingredients when birds are off feed or on hot or cold days.
  Helps maintain better bird health
- ENERGY BALANCE
  Nutritionally balanced to give TOP EFFICIENCY without building up fatty liver or other damaging or production slowing fat deposits.

Early Bird All Mash Laying or Breeding Feeds
ARE QUALITY FEEDS AND WILL GIVE RESULTS

Zimmerman Has Top Herd In County DHIA

The herd of Paul B Zimmerman, Ephrata R1, had the highest butterfat average in the Red Rose Dairy Herd Improvement Association during December

This herd of 26 registered Holsteins averaged 1815 pounds of milk and 75 pounds of butterfat with a 4 1 per cent test

Second high herd was the 19 registered Holsteins owned by Benmie L Fisher, Ronks R1 with 71 pounds of butterfat in 1,935 pounds of milk with a 3 7 per cent test.

High individual cow completing her lactation during the month was "Dolores", a registered Holstein in the herd of C Robert Greider, Columbia R2 She had 19,236 pounds of milk with a 4 7 test and 896 pounds of butterfat in 305 days

Second high cow, a registered Holstein owned by J Mowery Frey and son made 879 pounds of butterfat in 23,405 pounds of milk with a 3 8 per cent test

...y Show

...ble chem... ...mals ... ...s from o... ...lding d... ...tes and Ca... ...ada Bul... ...t time is imp... ...tant for ...l prep...tion A dairy show would need to be coordinated with other events and have the support and cooperation of all the many related organizations

One event attracts another Bull visualizes that added features to a big dairy show might include national conventions of dairy and other farm organizations breed association meetings and sales of registered animals The Pennsylvania Junior Dairy Show now a going concern could be a part of it

A Pennsylvania national dairy show as is true with the livestock exposition would be open to breeders in other states perhaps other countries In that respect it would differ from the Farm Show where only Pennsylvanians may compete

Bull said he would like to anticipate that eventually the national dairy show the livestock exposition and the Penna horse show might be merged but this would take a great deal of time and planning and possibly added space

But one big hurdle has already been cleared for a dairy show This would be a way of making added use of the Farm Show building and facilities and thus give the taxpayers an added return on their investment

A fall event during the "flaming foliage season" would help to increase tourist travel into and through the commonwealth

"Big undertakings demand a lot of imagination and push."

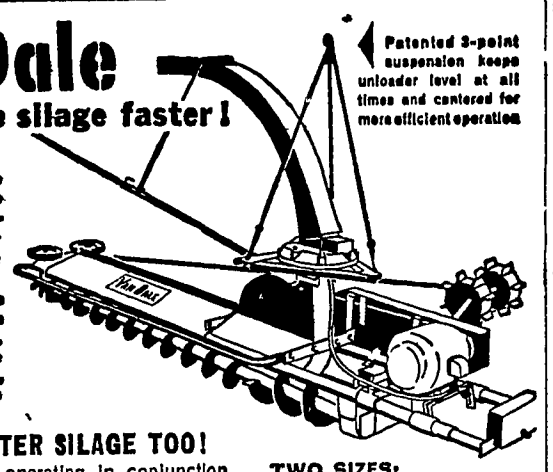
Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:

Standard—for silos 10' to 18'
Heavy Duty—for silos 12' to 30'

Eastern States Buys Feed Firm

WEST SPRINGFIELD, MASS, January 27 — Purchase of Unity Feeds enterprises by Eastern States Farmers' Exchange, Inc, was jointly announced by the presidents of the two organizations today.

Jonathan Davis of Sterling Junction, Mass, president of Eastern States, said that the cooperative would conduct the Unity feed operations as a separate division of its general farm supply services This will be known as the Unity Feeds Division of Eastern States. Henry L Atwell, Unity president assured the company's employees and customers that the new owner plans to continue operations in their present form for an extended period

The Unity Feeds office is at 177 Milk Street Boston The company operates two feed mills, one at Manchester, N H, and the other at North Franklin, Conn

Farm Prices Rise Sharply

HARRISBURG — Prices received by Keystone State farmers rose sharply in January with across-the-board gains for practically all products, according to the Pennsylvania Crop Reporting Service

Livestock and eggs led the upsurge that increased the mid-January average 3 per cent over December and brought it even with average prices received in January a year earlier

All classes of livestock were moving at stronger prices, with calves scoring the best gain — $1.80 a hundredweight Eggs were up to 41 cents a dozen three cents higher than a month earlier

Prices for all field crops, except rye and barley, were seasonally higher with wheat up seven cents a bushel, soybeans up five cents, corn up four cents, oats up one cent Potatoes were up five cents a hundredweight, and alfalfa hay was 50 cents a ton higher to equal the record January high of $45 set last year

Rye dipped a cent a bushel while barley prices were unchanged The average wholesale milk price also was unchanged from December but at $5 per cwt was 24 cents higher than a year ago

On the other side of the ledger, the mid-January cost of concentrate feeds was 5 to 10 cents above December and averaged 12 cents above a year earlier

Senior Extension Plans Banquet

Plans for the annual banquet were announced at a meeting of the Lancaster County Senior Extension club Thursday night in the Farm Bureau Building.

The banquet will be held March 7 at 6 45 in the West Willow fire hall with Miss Rebekah Sheaffer, Bareville, as the speaker Parents former club members and friends are invited

At Thursday's meeting Miss Ruth Shriver, Lititz showed slides of her travels in Europe which included her experiences while serving at a work camp in Austria

Vegetables—A Nutrition Bonus

By Mrs. Richard C. Spence

SPENCE

Whether you conserve or lose vitamins as you trim, scrape and peel vegetables depends a lot on knowing where the highest concentrations of vitamins are in the various vegetables The leafy parts of collard greens, turnip greens, and kale, for example, have much more vitamin A value than the stems or midribs do So, if you remove the fibrous stems and midribs to make the vegetables more acceptable to the family, the loss in nutrients is not serious

The coarse outer leaves of head lettuce contain higher concentrations of vitamins than the inner, tender leaves so it is good to use the outer leaves whenever possible The core of cabbage is as high in vitamin C as the leaves Broccoli leaves have much more vitamin A than the stalks or ones. Even so, young carrots flower buds; if the leaves are are a good source of vitamin tender when you get them A. Choose deep-orange varieHome, plan to eat them ties of sweet potatoes for Keep them cool and moist until highest vitamin A value they're ready for use.

Peppers are high in vitaYou get several times as mins A and C. much vitamin A value from If the tops of beets are atbright-orange, mature carrots tached and still tender when as from pale-colored, young you buy them, cook them They are rich in vitamin A. Turnip greens, kale, and collards are good sources of riboflavin as well as vitamins A and C Lima beans, peas, and young cow-peas (including black-eye peas) contribute appreciable amounts of thiamine and protein

Make full use of vine-ripened tomatoes in summer when they are plentiful and inexpensive. Tomatoes that ripen on the vine out-of-doors in summer sunlight are twice as rich in vitamin C as those grown in green houses in winter

We need vitamin A and C regularly for growth and healthy body tissues Vegetables are a primary source of these nutrients

Here are two ways, impressive to say the least, to serve asparagus.

ASPARAGUS SOUFFLE

1 10 ounce package frozen chopped asparagus
1 cup Bleu Cheese cracker crumbs, finely rolled
1 10½ ounce can condensed cream of asparagus soup
1 tablespoon lemon juice
4 eggs, separated
¼ teaspoon cream of tartar

Combine chopped asparagus, cracker crumbs, asparagus soup and lemon juice. Beat egg yolks Stir into asparagus mixture Beat egg whites until frothy. Add cream of tartar and beat until stiff, but not dry Fold into asparagus mixture. Pour into a greased 1½ quart casserole. Bake in a slow oven (325 degrees) 1¼ hours or until knife inserted in center comes out clean. Makes 6 servings.

* * * *

ASPARAGUS ON CHEESE WAFFLES

Cooked asparagus spears

WAFFLES:

1 cup sifted flour
2 teaspoons baking powder
1 teaspoon baking soda
2 eggs
2 cups buttermilk
1 cup finely rolled cheese cracker crumbs
2 tablespoons melted butter or margarine

SAUCE:

cans cream of chicken

Your family might like red cabbage made this way —

RED CABBAGE

3 tablespoons butter
1 medium head red cabbage, shredded
2 tart apples, cored, thinly sliced
¼ cup lemon juice
½ teaspoon salt
3 tablespoons sugar

Melt butter in saucepan. Add cabbage, sliced apples, lemon juice, salt, sugar; toss lightly. Cover, simmer 2 hrs over low heat, stirring occassionally Makes 4-5 servings.

* * * *

Spinach is tasty cooked or used in a salad

SPINACH AND LETTUCE BACON SALAD

4 cups (about ½ pound) 6 strips bacon, diced bite-size pieces raw spinach
2 cups bite-size pieces lettuce
2 hard-cooked eggs, finely chopped
⅓ cup salad dressing (any flavor)

Fry bacon until crisp, drain Place spinach and lettuce in a bowl Sprinkle bacon and eggs over the greens. Add salad dressing and toss lightly. Makes 8 servings.

* * * *

ZESTY SPINACH AND CELERY

1 10-ounce package frozen spinach
1 cup sliced celery
½ teaspoon salt
1½ cups boiling water
2 tablespoons butter
1 to 1½ tablespoons prepared horse-radish
½ teaspoon salt

Guides To Making A Shopping List Practical

THURSTON

When you shop for clothing, include sizes and preferences for various items Do this for each person on your list It may be helpful to keep an up-to-date record of sizes on a card in your billfold or handbag

For home furnishings you need information on measurements of rooms windows or furniture Also you'll need to take with you sample swatches of paint, floor coverings, and decorative fabrics that are to be matched or coordinated with new items you buy

When you shop in a department store, list the items to be bought in a workable order — from basement or first floor up or from top floor down In a shopping center shop one side of the street, than back on the other.

Shopping as a family could be handled this way — split the shopping list among family members with each person responsible for certain items Children can pick up such standard items as milk, eggs, or bread, and give you time to make major choices

On-The-Shelf Storage For Foods

Some foods can be stored at room temperature in kitchen cabinets or in the basement Such on-the-shelf foods have a relatively long storage life. But most foods stored on the shelf should be tightly sealed and kept in a dry place away from light and heat

Foods which can be kept satisfactorily on the shelf include

Unopened canned foods, unless otherwise indicated on the label.

Dried foods, such as vegetables and fruits

Prepared mixes, puddings, gelatin spices and seasonings.

Grain products including

(Continued from Page 9)

⅛ teaspoon pepper
¼ cup cream

Cut frozen block of spinach into 1½ inch cubes. Add celery and ½ teaspoon salt to boiling water in saucepan. Cook until celery is almost tender Then add spinach, bring again to a boil, and cook gently 4 to 6 minutes, or until spinach is just-tender Drain well. Add remaining ingredients and mix well. Heat thoroughly Serve on hot platter with slices of hot boiled tongue, luncheon meat, or sliced ham or chicken. Makes 4 to 6 servings

* * *

Savory sauces can do a lot for peas —

SAUCE FOR COOKED PEAS OR LIMA BEANS

2 tablespoons minced onion
2 tablespoons butter
1 can (10½ ounces) condensed cream of chicken soup
⅓ cup milk
2 tablespoons chopped parsley
2 teaspoons lemon juice

In saucepan cook onions in butter until tender Blend in soup, milk, parsley and lemon juice Simmer a few minutes, stirring now and then Makes about 1⅔ cups sauce.

* * *

SAVORY PEAS

3 tablespoons butter or margarine
⅓ cup chopped onion
1½ cups thinly sliced celery
1 10-ounce package frozen green peas
2 tablespoons hot water
¾ teaspoon salt
Dash pepper
Pinch of thyme
½ teaspoon Worcestershire sauce
2 tablespoons diced pimento (optional)
1 tablespoon chopped parsley

Melt butter in saucepan, add onion and celery, and saute slowly about 5 minutes, or until onion is golden brown. Add peas, water, salt, pepper and thyme Cover and simmer 6 to 8 minutes, or until peas are just tender. (Do not overcook.) Add Worcestershire sauce, pimento, and parsley, mixing lightly. 4 or 5 servings.

Cold Weather Fails To Harm Winter Grains

Unusually cold weather prevailed during December but winter wheat, barley and rye had protective snow cover to minimize damage according to the Pennsylvania Crop Reporting Servcie.

Except for a few days temperatures were persistently below normal and at Pittsburgh average temperature was the lowest of record dating back to 1871 At other Weather Bureau stations temperatures approached record lows Precipitation for the month, mostly as snowfall, was one-half to one inch below normal The heaviest general snowfall occurred on December 23 when amounts totaled 10 inches or more in some areas Most areas of the State had snow cover most of the month Shortly after Christmas melting snow added some moisture to soils

Two Countians Win Prizes In Broiler Contest

Two Lancaster County broiler growers are winners in a contest conducted by Pennsylvania Farm Bureau Cooperative Association, Harrisburg

They are H Harold Muller, Conestoga RD2, and Paul Hershey, Manheim RD2 Each received a four-quart electric ice cream freezer in the "broiler buster" competition.

The contest was held for Farm Bureau broiler growers in three groups those with flock sizes up to 7 500 birds, flocks from 7,500 to 11,000, and over 11,000 Muller topped the under-7,500 group, and Hershey was in the 11 000-plus category

Winners were determined on the basis of lowest per-pound cost of production, according to Duncan F Woodward, manager, Farm Bureau Production Services Jay Habecker Lititz, is flock supervisor for the two Lancaster winners

CHORE-MATIC

50,000 owners can't be wrong. They chose Chore-Matic. Because Chore-Matic is tested and proved. Because Chore-Matic is the originator of enclosed poultry feed conveyors. Because Chore-Matic combines the desirable features of hand feeding and automation to produce a feeder far superior to chain-type units. Ideal for all kinds of houses and bulk feed-handling systems, the Chore-Matic is available in single or multiple lines in lengths up to 350 feet.

Unique conveyor system—Heavy-duty spring steel auger revolves inside 18 ga. steel tube, moves feed uniformly to all pan outlets, no grinding or ingredient separation, no dangerous parts to injure bird or operator. Smooth, quiet operation.

20% more feed space per line—No picked over feed. Fresh supply drops into place soon as bird eats her share. No crowding when feeder turns on because feed distribution is uniform throughout the house. Pans are "all age" type, 13 inches in diameter. Special lip design and feed-saver guards minimize bill out feed waste. Electric anti-roost guard is standard equipment.

No maintenance problem—Simple direct drive virtually eliminates maintenance. There are no moving parts except auger itself. Constructed of heavy-duty galvanized steel and finest quality components.

Suspended from ceiling—Quick height adjustment. No sagging—uneven floors or rusty leg stands are no problem. For fast clean out, one crank takes whole system to the ceiling. Gives unrestricted bird movement.

Farm Women 10 Charter Bus To Flower Show

Farm Women Society 10 will charter a bus to the Philadelphia Flower Show on March 11.

The bus will leave the Lancaster terminal on East Chestnut Street at 7 a.m. Seats are available and anyone interested may contact Mrs. Frank Hodecker, 907 Rohrerstown Road, Lancaster.

Announcement was made at a recent meeting in the home of Mrs. William Fox and Mrs. Eliza Esbenshade, 1200 Wheatland Ave., Lancaster. Mrs. Clifford Shoemaker, president, conducted the meeting.

Roll call was answered by "a gift we can get." The program theme was "Missions at home and abroad", with Mrs. J. N. Byler of Akron, whose husband was a missionary, as the main speaker.

Valentines were gathered and will be given to the crippled children of Elizabethtown Crippled Children's Hospital. A donation of $15 was given to Heart Haven. A new member was welcomed, Mrs. Lewis Bowser, Lititz R3.

Two women were appointed to buy material to make cancer pads. They are Mrs. Enos Royer and Mrs. Jacob Esbenshade. The next meeting will be March 7 at the home of Mrs. John McGrann, 25 Eshleman Road.

Farm Women 6 Add Member

Mrs. Wayne Sweigart was welcomed as a new member by farm Women Society 6 at a recent meeting in the home of Mrs. Clarence Greiner, 729 Groff Avenue, Elizabethtown.

Mrs. Mark Geyer, president, was in charge of the meeting and Mrs. Stanley Myer conducted the devotions. Roll call was answered by a nature verse on "love."

Mrs. Esther [illegible] and Mrs. Mary Schaeffer reported to the late Farm Women's convention in Harrisburg and reported on the meeting.

Hostesses were Mrs. Clarence Greiner, Mrs. Susan Brill, and Mrs. Kathryn Miller.

Misses Anna Mae and Ruth Eby, Mount Joy, told of their trip through the Caribbean [illegible]

[illegible] interested in quilting at the home of Mrs. Mary Hoffer on Monday, Feb. 10 at 6:30 p.m. to make candle wicks. The next regular meeting will be March 7.

"This goes on Mr. Jones' Tractor" That's about how it is on the assembly lines of John Deere products. From the many options available, John Deere custom-builds, on a mass-production basis, a product that will meet your most exacting needs. For instance, a tag accompanying every tractor through the assembly line, lists our name plus every optional item from engine type down through the cigarette lighter. Through our dealership, you can purchase a product so well customerized to your liking that you might well have directed the assembly yourself. This is but one more example of how John Deere insures you of greater satisfaction and value when you invest in **The Long Green Line.**

Keys To Keeping Quality In Milk

Refrigerate milk quickly after it's delivered or after you bring it from the store Bright heat can affect milk flavor In as little as 15 minutes exposure to sunlight can cause milk to lose vitamins

Keep milk cold After you take what you need from the container return the unused milk promptly to the refrigerator Cold preserves the fresh flavor and the milk keeps longer

Keep milk covered at all times Milk absorbs odors easily from other foods especially such foods as onions and fish.

Use oldest milk first When you get a fresh supply put it to the back of the refrigerator, then use the oldest milk first

Good To Know Anytime

Ice cream is America's favorite dessert It's preferred for its flavor food value and ease of serving Keep a variety of flavors on hand in the freezer for quick and easy family and company desserts

Dairy foods are efficient foods they give a high nutritive return for the money spent To keep your family in the glow of health and stay within your food budget, use dairy foods often and serve in different ways

Business Man
MR. ~~DAIRYMAN~~:

HOW MUCH WOULD AN EXTRA TON OF MILK PER COW MEAN TO YOU?

Many dairymen who have challenged their herds — who have fed for more milk — have found that their cows can often produce as much as 2,000 extra pounds of milk per year, when fed the PIONEER way.

If you're milking 100 head, an increase of 2,000 lbs. of milk per cow would mean 200,000 lbs. more milk per year for you to sell. At $4/cwt., the extra milk would bring an extra $8,000!

Management for profit the PIONEER way can mean big additional earnings for you. That's why thousands of successful dairymen rely on PIONEER feeds and feeding programs to help them milk out the total bred-in production capability of their cows — to help them get more profit from each cow.

Challenge your herd! Find out how good your cows really are. Stop in soon and talk over your production problems with us. Remember, there's a PIONEER feeding program to fit your need.

PIONEER®

Feed Dealers Call For Lower Freight Rates

Speaking on behalf of the Pennsylvania Millers' and Feed Dealers' Association, a statewide organization composed primarily of independently-owned feed and flour mills, Donald W Parke, Executive Secretary of that Organization appealed to the rail carriers of the East at a public hearing held in Chicago, Ill January 30, to lower their freight rates on grain and grain products

The hearing was held by the Traffic Executive Association — Eastern Railroads, the Organization which represents the railroads of the East

In his testimony Parke pointed out that Pennsylvania is a substantially corndeficit state and its dependence upon the midwest for corn and other grain is likely to become greater due to urban sprawl industrialization and government programs

Hog Slaughter Sets Records

HARRISBURG — Pennsylvania's booming meat business set another record in 1963 with 3,225,000 hogs slaughtered .. the first time in the Commonwealth's history the total topped the three-million mark

Slaughter showed an increase of 332 000 hogs, or 11 per cent, over the previous high recorded in 1962, according to the Pennsylvania Crop Reporting Service

Cattle slaughter in 1963 was up also reaching a total of 900 500 head compared to 897,000 head in the previous year

The increases were in line with the national trend that saw red meat production in 1963 rise 6 per cent over the previous year, the PCRS said U. S production last year totaled 29,521 million pounds Beef accounted for 16,050 million pounds up 7 per cent Pork, at 11,868 million pounds, was up 6 per cent.

Calf, sheep and lamb slaughter was down in both the nation and the state Pennsylvania reported 667,000 calves slaughtered, compared to 715,000 the year before Sheep and lamb slaughter slumped to 248 200 head compared to 376,500 in 1962

Celery Meeting Is Scheduled

Dr Roy Creech, Pennsylvania State University plant breeder will discuss the present status of staked tomato varieties and problems of producing a better celery at a meeting in the packing room of Amos Funk Millersville R1 on Monday February 10 at 1 30 p m

The meeting, sponsored by the county extension service in cooperation with the county vegetable growers will also feature talks by Ernie Bergman plant nutritionist, and James Dutt extension vegetable specialist

The meeting is open to all vegetable growers and other interested persons according to Annie Lueck, assistant county agent.

Livestock Co-op Reelects Slate

Producers Livestock Co-operative reelected four directors for three-year terms last Saturday during its 21st annual meeting at Lancaster County Farm Bureau Cooperative, Dillerville Road

Reelected to the cooperative board of directors were Harry E Hershey, Marietta R1, John W Sangrey Conestoga R2 Joseph K Kreider, Lebanon County and G Pownall Jones, Chester County

Speakers at the meeting were Kreider, County Agent M M Smith and Miles Horst, special assistant to Gov Scranton and former state secretary of agriculture

Sheep Numbers On The Increase, Morgan Says

An extension livestock specialist from the Pennsylvania State University Wednesday night predicted a climb in numbers of breeding sheep in the state in the next few years.

Ben Morgan, speaking at the first of a series of three sheep clinics sponsored by the county extension service, said, despite increased popularity of beef and synthetic fibres, the pendulum of increased lamb and wool consumption is swinging back.

Whole synthetic fabrics have made big inroads into the domestic wool industry, but wool is again gaining as manufacturers are learning that "the two can live together quite harmoniously"

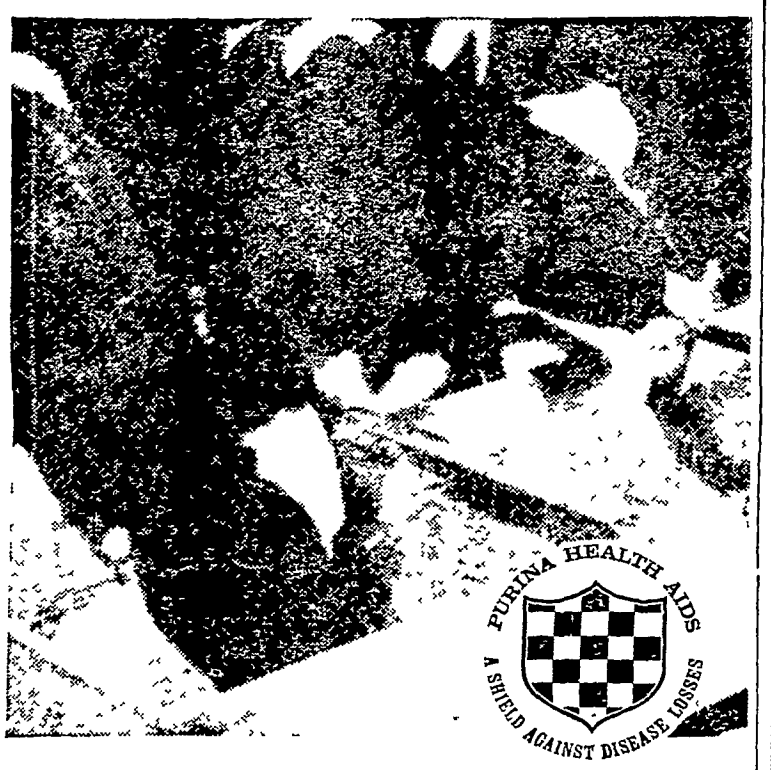
He said if the consumer could have a 12 month supply of springs available, individual consumption would increase substantially from the present 4 9 pounds a year.

He predicted Pennsylvania breeders and feeders could supply a million slaughter lambs a year to the Eastern Kosher trade without fear of over supplying the market or breaking prices.

Morgan noted five major lamb slaughter plants in the New York area process in one month the equivalent of the state's yearly lamb output

He told 50 persons attending the meeting there is "definitely room to approach the states high sheep number figure of 1, 160, 000 set in 1900.

Checkerboard News®



DOUBLE-TROUBLE FOR CALF SCOURS

Here's double-trouble for scours problems in your dairy calves . . . it's new Purina Neomycin Soluble and Purina Neomycin Feed Mix.

Powerful neomycin sulfate in these two great Health Aids concentrates its action in the intestinal tract . . . stops serious scours problems before they have a chance to develop.

You just mix Neomycin Soluble in drinking water, milk or milk replacer . . . or have us Check-R-Mix new Neomycin Feed Mix in your regular calf rations.

Remember to ask for New Purina Neomycin Soluble or Neomycin Feed Mix the next time you stop by our Checkerboard Store.

Looking For A New Tractor??

DON'T BUY UNTIL YOU HAVE SEEN

THE NEW FARMALL 706 OR 806

HERE IS WHAT NOAH AND RICHARD KREIDER OF MANHEIM HAD TO SAY ABOUT THEIR NEW FARMALL 806 . . .

"We like the power shift TA which is so easy to operate and holds on hills. We are also well pleased with the new hitch on this tractor. We have used Fast Hitch tractors for a long time now. IH's new draft control system makes this hitch even better".

See your International Harvester Dealer Today for the Full Story on New Total Power Tractors From International Harvester . . . The People Who Bring You Machines That Work.
